

IOWA STATE UNIVERSITY

Extension and Outreach

Ultra high performance concrete (UHPC) has become one of the major advancements in concrete technology in the last two hundred years. The organizing committee supported by the International Scientific Advisory Committee has planned the First Interactive Symposium on UHPC in Des Moines, Iowa. The interactive symposium will provide a platform to share knowledge about material and structural design, application examples and opportunities, to identify knowledge gaps and to grow the UHPC family dedicated to truly work together to achieve similar goals.

Giateg will have Sarah DeCarufel in attendance, our technical support adviser.

[Contact Sarah](#) if you would like to meet and see a demonstration of Giateg products simultaneously

Date - July 18th - 20th 2016

Location - Des Moines, Iowa
