

Date: March 26 - March 30, 2017

Location: Marriott Detroit at the Renaissance Center

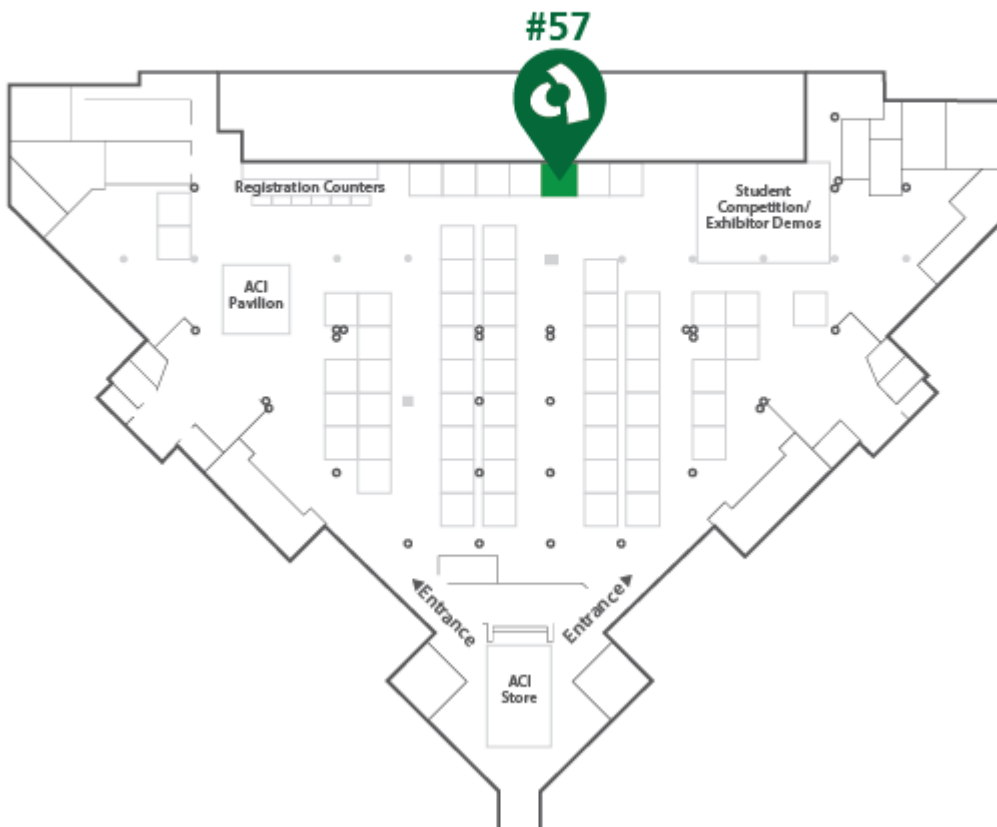

Detroit , MI United States

The ACI Concrete Convention and Exposition will be held March 26-30, 2017 in Detroit, MI. ACI conventions strive to bring together the top leaders in the concrete industry who work tirelessly to improve the design, construction, maintenance, and repair of concrete projects. Providing a forum for networking and education and an opportunity to provide input on the concrete industry's codes, specifications, and guides, these conventions are not ones to miss!

Committees from around the globe meet to develop the standards, reports, and other documents necessary to keep up with the ever-changing world of concrete technology. Committee meetings are open to all registered convention attendees, providing technical and educational sessions for attendees with the latest research, case studies, best practices, and the opportunity to earn Professional Development Hours (PDHs). ACI conventions further offer numerous networking events where you can meet with many of the industry's top engineers, architects, contractors, educators, manufacturers, and material representatives from around the world.
