

World of Concrete is the most important annual event of the year for the entire concrete and masonry industries! WOC features special product and action areas such as the Producing Center - a marketplace of materials, equipment, demos and seminars, as well as Technology for Construction. Technology for Construction features the newest products and tools for the construction industry!

This year, Giatec is proud to be a part of the WOC convention! We will be featuring our newest concrete testing solutions such as the Smart Concrete and SmartRock2 for wireless monitoring of concrete properties. Our revolutionary corrosion detection device, iCOR, will also be showcased. In addition, we will be announcing a new concrete sensor! Please visit our **Booth #S13418** in the South Hall for a hands-on experience with these technologies and to receive exclusive WOC offers.

Latest Advancements in Smart Concrete Testing Technologies!

LABORATORY TESTING • NDT CORROSION INSPECTION • SMART CONCRETE SENSORS

Giatec Scientific Inc.
South Hall #S13418

Why attend this year's WoC?

- Get connected. Make new contacts and strengthen your industry connections.
- Work smarter. Learn how to work leaner, get the safety training and courses you need in today's economy.
- Get hands-on. See, touch and test the latest products under real-world, jobsite conditions.

- Get your questions answered. Attend expert-led seminars for the new skills, practical solutions and creative strategies.
