

In light of The construction season upon us here in Canada, here is a very informative infographic about bridge inspection practices in America and where the country currently stands. Bridge inspection practices are not complying with the standards and the matters are not taken seriously. Infrastructure in North America is a serious concern and should not be taken lightly as it can endanger lives of innocent civilians.

# USA Bridge Inspection

*A Crumbling State*

## Realities in America

Over **70,000** bridges in America are structurally deficient

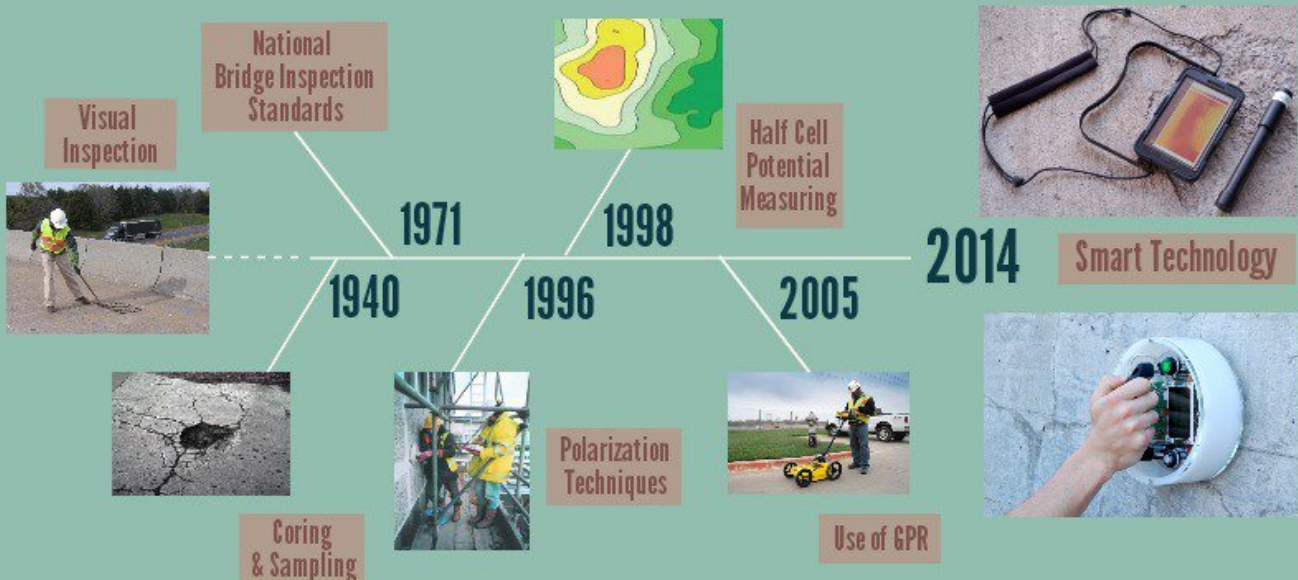

**\$114 Billion** in backloged bridge inspections projects

**42 Years**

is the average age of bridges

## Bridge Inspection Evolution

Here at Giatec, we offer efficient and cost effective solutions and we are currently working on breakthrough technology to detect corrosion in existing infrastructure, especially bridges. We have incorporated smart technology into our methods to ensure accurate data, and no risk of human error. tests can also be done in a more timely matter, thus, minimizing opportunity costs of labor and time.
